

UK SPRING PROMOTION 2024

Valid from 01 April until
30 of June 2024

DENTAPURE™ CARTRIDGE

DAILY WATERLINE MAINTENANCE BECOMES A SIMPLE, ANNUAL ROUTINE ††

Independent Water Bottle Cartridge **DPI365B10**

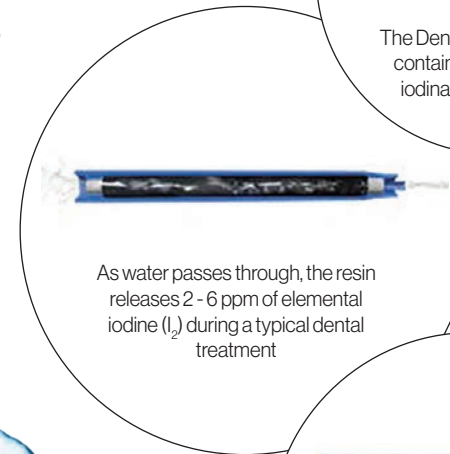

For independent water bottles. Easily installed by office staff onto existing pickup tube with included fitting.

Did you know?

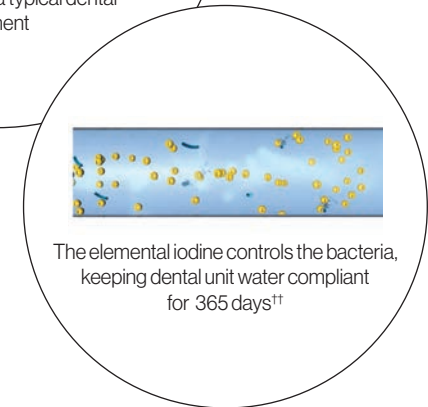

- Elemental iodine as found in the DentaPure™ Cartridge is not known to cause sensitivity reactions
- Elemental iodine (I₂) contains no allergenic proteins. Patients are not allergic to iodine; they are allergic to the protein sometime attached to it⁷. Contact Crosstex with any questions or concerns related to iodine and patient treatment
- The DentaPure™ Cartridge uses the same technology developed for NASA to ensure that water consumed in space is safe from harmful levels of bacteria and many other harmful organisms
- Many university systems and dental schools rely on the DentaPure™ Cartridge for compliance in their clinics.

The DentaPure™ Cartridge contains non-allergenic iodinated resin beads

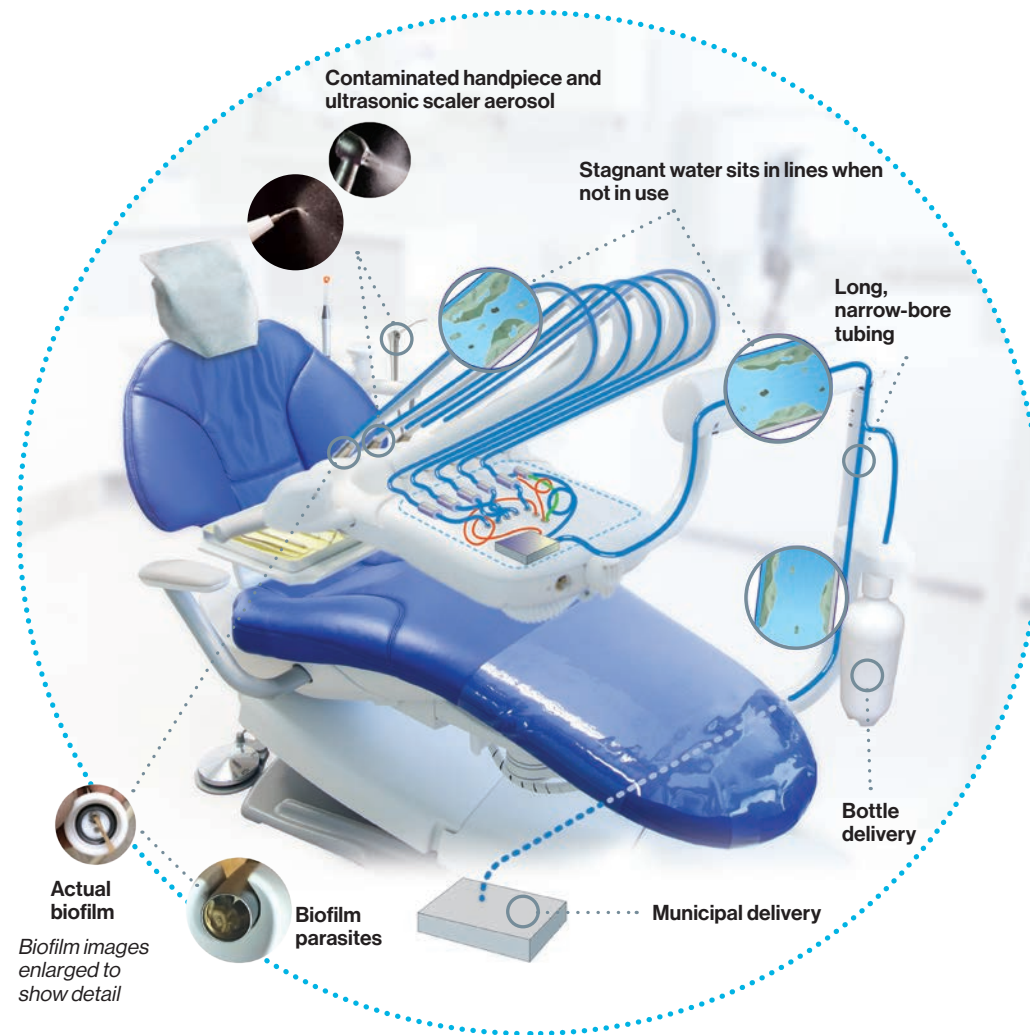

As water passes through, the resin releases 2 - 6 ppm of elemental iodine (I₂) during a typical dental treatment

The elemental iodine controls the bacteria, keeping dental unit water compliant for 365 days^{††}

**ONE DENTAPURE™ CARTRIDGE
= 365 DAYS †† COMPLIANT^{††}
DENTAL UNIT WATER**

DENTAL WATER MANAGEMENT CROSSTEX**

DENTAPURE™ CARTRIDGE

THE BENEFITS:

Compliant†
No harsh chemicals.
no special disposal
requirements

Effective
EPA Registered to
provide ≤ 200 CFU/mL
for one-year or 240L of
water¹

Easy
No routine shocking,
can be quickly and easily
installed by office staff.

Reliable
Reduces the possibility
of human error.
Technology developed
for NASA.

365 DAYS
One DentaPure™ Cartridge
= 365 days^{††} compliant[†]
dental unit water

For more information on how the multi-award-winning DentaPure™ Cartridge can help simplify your DUWL maintenance protocols, visit: hufriedygroup.eu/en/dental-unit-waterlines

EVACUATION PRODUCTS CROSSTEX**

COMFORT PLUS™ PREMIUM SALIVA EJECTORS

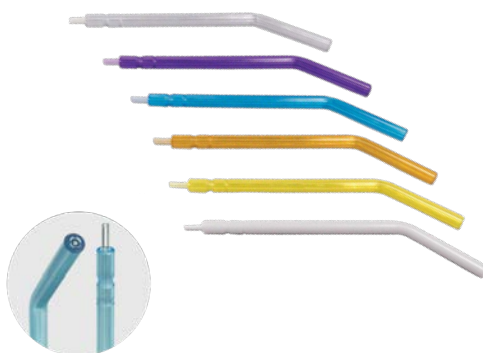

Comfort Plus™ Saliva Ejectors are the kinder, gentler saliva ejector that takes in fluid, not tissue. With a smooth, rounded tip designed to enhance patient comfort, it will not grab mucosal tissue. Facilitates uninterrupted fluid and light debris removal. Optimizes fluid removal as tip design prevents tissue from blocking suction.

AIR & WATER SYRINGE TIPS

Sparkle™ Air/Water Syringe Tips feature a Quad Core™ air channel to ensure complete air and water separation.

The five translucent colors allow for visualization of water flow/blockage, and no adapter is required for easy and secure installation. A locking groove ensures tip is securely installed and a beveled edge provides increased patient comfort and safety. Single-use eliminates risk of cross-contamination and cleaning of syringe between patients.

HARMONY™ ERGONOMIC SCALERS AND CURETTES

REDUCED PINCH FORCE

REDUCES PINCH FORCE UP TO 65%⁴

This may alleviate hand fatigue and injury risk due to repetitive motions.^{5,6,7,8}

LESS PRESSURE

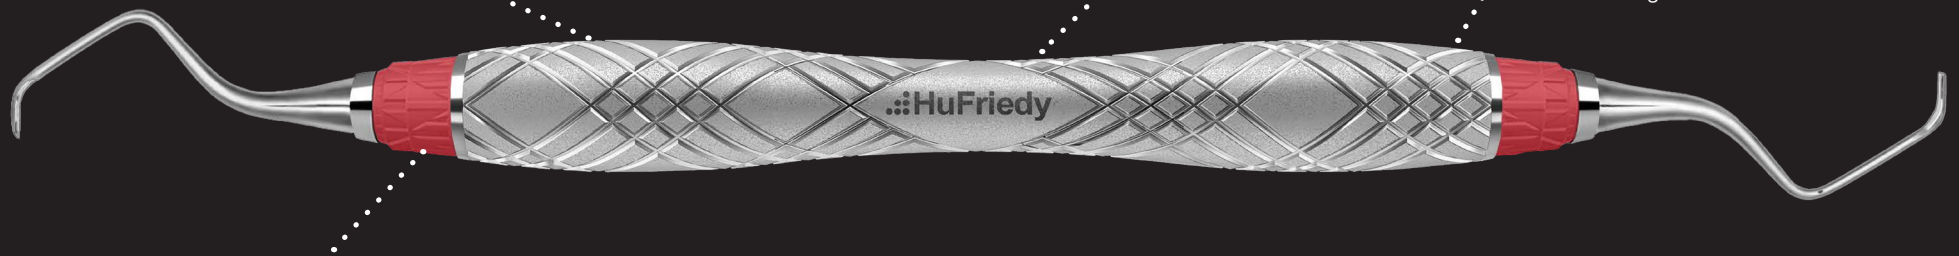

REDUCES PRESSURE ON TOOTH BY 37%⁴

Harmony™ Ergonomic Scalers and Curettes may increase patient comfort, while reducing clinician fatigue because it requires less pressure to the tooth when scaling.

BALANCED

NOT TOO HEAVY OR TOO LIGHT

The Harmony™ Ergonomic Scaler and Curette's perfectly balanced handle is similar in weight to our best in class EverEdge™ 2.0 #9 Metal Handle.

COLOR CODED

SECURE AND NIMBLE GRASP

The silicone grip has been extended by 30% which can provide a secure and nimble grasp while using the instrument.³ The geometric pattern is specifically designed to maximize grip in all directions.

HANDLE HARMONY™

INSTRUMENTS FOR CLEAR ALIGNERS HU-FRIEDY

NEW

THE PETITE PUNCH

The Petite Punch cuts a 4,5mm half-moon cutout in an aligner for relief of the plastic around bonded buttons used for elastics. When only a small cut-out is required to provide clearance for buttons or hooks on the buccal but also on the lingual of any tooth in the aligner, especially for smaller teeth. The Petite Punch can also nip away plastic to provide soft tissue clearance to prevent aligner impingement of tissue.

Watch the [instructional video](#) for this instrument

678-805

The Petite Punch

Sugg. Retail £ 169

Promo £ 130

THE COUNTER CLOCKWISE WEDGE

The Counter Clockwise Wedge is used to produce a wedge-shaped indent in an aligner at the facial and at the opposite line angle lingual for a specific tooth to create a rotational couple. Used to create a counter clockwise rotation.

Watch the [instructional video](#) for this Instrument

678-807

3SSENTIAL KIT BY WERESTORE.IT

The 3SSENTIAL KIT is a collection of 3 essential instruments: 1 anterior, 1 posterior and 1 spatula. These 3 instruments help streamline restorative setups ensuring what you need to create highly aesthetic composite restorations is at your fingertips. An additional unique modeling instrument, Calibra, helps provide the proper anatomical curvature to the dentin material layer of a restoration and leaves the ideal space for the final layer of enamel material. Included, you will find more details on the "solid brush" and the "Plug & Sculpt" technique as well as other benefits of utilizing these essential instruments.

MECHANICAL IRRIGATION KITS

PHYSIODISPENSER AND PIEZOELECTRIC SURGERY

Benefits for clinicians, dental team and patient, for all surgical procedures.

- Good irrigation during implant placement is fundamental to good osseointegration and a successful outcome.
- Wide range of mechanical irrigation lines compatible with most models of implantology motors. Irrigation systems include a perforator with air intake, a flow control knob or clamp, fixings and an integrated section for peristaltic pump.
- A practical end cap makes it easy to connect the irrigation line to the handpiece. The tip allows you to connect tubing to the multiple models of cooling needles available.
- Mechanical irrigation systems have the following options:
 - a. Internal irrigation only
 - b. External irrigation only
 - c. Internal and external irrigation

SCISSORS & TISSUE PLIERS HU-FRIEDY

DID YOU KNOW? All hinged instruments – forceps, rongeurs, scissors, pliers, hemostats, orthodontic pliers, etc. – should be kept lubricated. Regular use of proper lubricants, like HU-FRIEDY Instrument Lubricant Spray (ILS), will prevent rust, corrosion and stiff joints to ensure smooth operation.

All hinged instruments should be sterilised in the open position.

SURGICAL TABLE & TROLLEYS OMNIA*

OLEODYNAMIC INSTRUMENT TROLLEYS

The oleodynamic Mayo table, which is entirely made of stainless steel, with a 4-leg base in die-cast aluminium on castors, completes the equipment of any dental surgical theatre. Base legs contain heavy alloy hidden weights for a better stability. The oleodynamic column and foot pedal allow a quick adjustment in height of the working surface. The tray, 73 x 47 cm, allows accommodating a large number of surgical instruments. The table is electropolished by immersion to ensure a lower bacterial adherence.

Detail Junction

Code	Description	Sugg. Retail	Promo
30.E0022.00	Oleodynamic instrument trolley equipped with single tray with raised edges. It is manually adjustable in height from 86 to 120 cm (tray: 73 x 47 x 2,5 cm) - 31,5 kg, 1 Piece	£ 1.558	£ 1.299
30.E0018.00	Rotating junction 360° for instrument trolley with oleodynamic pump (optional item), 1 Piece	£ 96	£ 86

STAND FOR COOLING SYSTEMS

The stand with wheeled base is made of stainless steel. It allows positioning and supporting the OMNI-VAC aspiration system, and the wheels allow moving it easily around the surgical room. The tray may be used as a shelf to support the Physiodispenser.
