**New Synea
Power Edition**

For the hardest
materials.

Restoration & Prosthetics

Contra-angle Synea Power Edition

For the hardest materials

The Synea Power Edition is especially designed for heavy-duty applications, such as the removal of decayed materials, cavities, fillings, crowns, and bridges. They are the optimal solution for advanced ceramic material like **zirconia** that is increasingly being used in restorative dentistry.

synea

Oral Surgery & Implantology

Piezomed Classic & Modules

"A real practice builder"

"I first purchased the Piezomed from W&H when I left general practice to commit to being a peripatetic implant surgeon in 2019. Since I began using the unit, I've noticed that surgical procedures that involve bone removal, block bone grafting and sinus surgery have become safer and more predictable. Patients also report less postoperative pain versus traditional methods. It has been a real practice builder and led to fewer complications which is so important when I am only occasionally travelling to some practices. More recently, I have become dependent on the kit for 'simple' extractions as the attachments have led to more atraumatic and faster tooth removal. It's a feature that I wish I had explored sooner!"

I would say the biggest benefit is that the unit automatically detects the tips that are attached and changes the settings accordingly. During complicated implant surgeries I prefer not to have to worry about adjusting the settings. So, for extractions, sinus surgery, surgical extractions involving bone removal and block bone grafting, I just have to plug in and play. Ultimately, modern oral surgery shouldn't be performed without piezo bone removal. The ease of use of this unit in particular makes it so simple to work with – I can't recommend it enough."

Piezomed Instruments

The W&H Piezomed instrument range includes different instruments for bone surgery, periodontology and extraction, for retrograde endodontics and for lateral sinus lift.

Tips compatible with all Piezomed units.

Bone surgery

The fine saw tooth design – more teeth per instrument – sets new standards in the field of bone preparation.

Periodontology and extraction

Instruments for thorough cleaning in periodontitis treatment and for atraumatic tooth extraction.

Retrograde endodontics

Diamond-coated, delicate instruments for easy access during retrograde root canal preparation.

Lateral sinus lift

The instruments permit safe lateral preparation of the maxillary sinus wall and gentle mobilization of the Schneiderian membrane.

Preparation of the implant site and crestal sinus lift

The preparation instruments are specially matched to the bone qualities predominant in the maxilla.

Osstell Beacon

Measurement of
implant stability

Osstell Beacon

Measure and evaluate the stability of the implant whilst monitoring its osseointegration.

RRP £113

What are the positive outcomes when using the Osstell Implant stability solutions?

- A positive experience for patients, encouraging trust through understanding
- Enhanced patient education builds confidence, resulting in increased treatment acceptance
- Reduction in treatment visits and failures with improved average healing times
- Improved outcomes for patients with risk factors
- Enhanced communication between specialists ensuring a more synergistic approach to treatment
- Improved treatment documenting

Osstell ISQ devices with the Osstell ISQ Scale help implantologists to make informed implant treatment decisions.

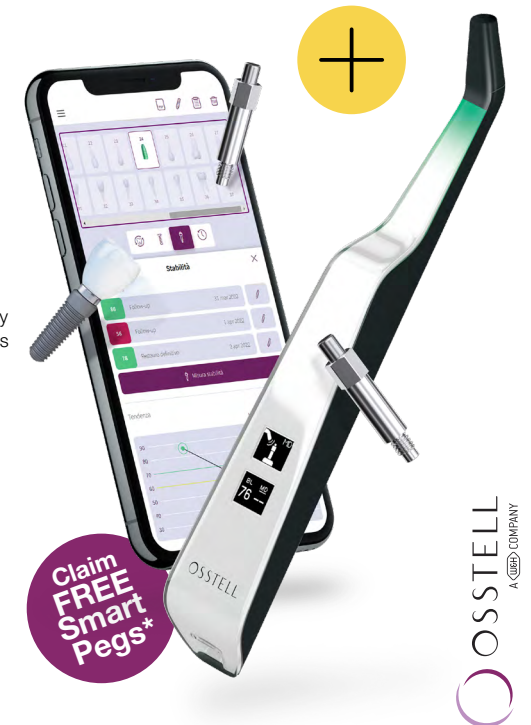

Osstell Connect
FREE App for
Osstell Beacon

Osstell Connect is designed to document quantified data which ensures traceability, whilst complimenting data in your Patient Management System.

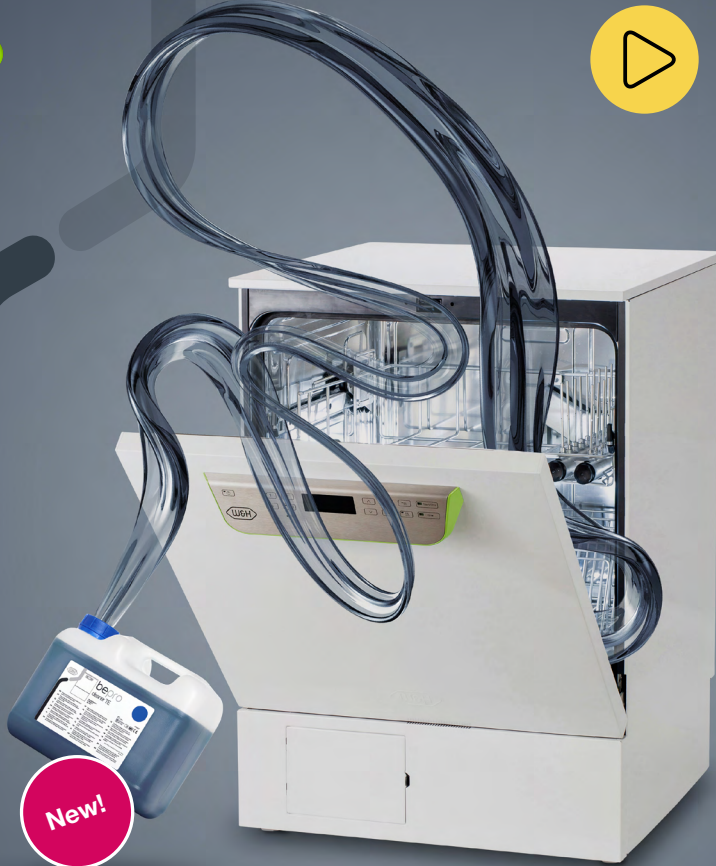

Systems with graphical presentation of data and statistics which is great for patient communication. You can easily present treatments in a graphic and totally personalized way, even generating pdf reports, while having access to the world's largest online surgical portal for peace of mind. The patient consultation tool allows you to easily communicate your proposed implant.

07995 315089

david.barrass@wh.com

W&H would like to introduce David Barrass who has joined the Sales Team as Business Development Manager looking after Scotland and the North East of England. David has worked in the dental industry for 8 years, most recently as Sales Manager at Trigiene Dental, specializing in handpieces and small equipment. He has a wealth of experience in this area and is looking forward to working closely with his customers and local dealer representatives to ensure that they continue to receive a consistently high level of service, advice, and support. David is keen to maximize W&H's profile across Scotland to provide customers with the information and support they need to make informed purchasing decisions based on product awareness.

Outside of work David enjoys long hikes with his labradoodle Bernie, skiing holidays in the winter and beach holidays in the summer, with ticking off visits to all the Greek Islands being a high priority on his bucket list. To relax, David is happy to sit in front of the TV especially if he can watch Top Gear or Friends.

"Suits our needs"

Dr Stephen Young

Dentist

"We invested in a Lisa sterilizer from W&H based on our need for a vacuum autoclave. From the Lisa's touchscreen display panel, we can select a setting that suits our needs from a number of different sterilizing cycles. We would recommend the Lisa sterilizer as it's easy to use. The best feature of this system is that it automatically data logs all cycles, so there is no need to print out information on every cycle and file it for future reference. Moreover, we have always received very good customer service from W&H and if we have needed an engineer, we haven't had to wait long for one to visit our practice."

"Exceptional service from W&H"

Dr Rajen Vadher

Quadrant Dental Care

"I have been using handpieces from W&H since the turn of the century and have always found them reliable and easy-to-use. By chance, one day I was sent a pre-paid envelope by W&H that allowed me to receive a free quote/inspection before repair on the handpieces. W&H very quickly emailed me back regarding the handpieces, providing a detailed fault analysis and their recommendations. They followed this up with very useful quotes for exchange and repair, allowing me to invest in some new handpieces which I look forward to lasting me until retirement! I would definitely recommend W&H to other professionals – the customer care is exceptional and the team is always happy to help."
