# FOREWORD

## TOGETHER, WE'RE BUILDING THE FUTURE OF ORAL HEALTH.

Dear Practitioners,

A new year is upon us, one that promises to unveil a multitude of opportunities and innovations to enhance your daily practice.

Indeed, this year will be marked by exciting events, including the IDS congress in March, showcasing new products designed to simplify your treatments, optimize your work ergonomics, and ease your daily routine.

We are proud to officially launch:

- **The wireless foot pedal**, compatible with all implantology motors from the Bien-Air range. Enjoy unparalleled freedom of movement and ergonomics, designed for your comfort.
- **The ILP (Immediate Loading Probability) feature**, now included with the iChiropro App. This technological advancement will assist you in decision-making for the immediate loading of

implants, without altering your usual protocols. A valuable aid for gaining peace of mind and efficiency.

- **The new blue ring contra-angle**, a high-performance rotary instrument designed to meet the demands of your daily practice, combining durability, precision, and value for money.

We are committed to providing solutions that meet your expectations and to continue building, alongside you, the future of dental surgery.

Let's stay connected throughout this promising year. Don't hesitate to reach out to our teams and distribution network to explore these innovations in detail or to participate in our events.

See you soon.

The Bien-Air Team

## THE LEGACY OF RELIABILITY

Rediscover a timeless handpiece. With close to **30 years of existence**, the durability of the CA 1:1 is beyond compare. Designed with cutting-edge innovation, it offers unrivalled precision guaranteed to last for years. Thanks to the CA 1:1 contra-angle, Bien-Air quality is now at your fingertips.

micro  
SERIES

**DUALOOK™** lighting paves the way for exceptional visibility of the working area.

**ENHANCED LIGHT INTENSITY** thanks to multi-strand optical glass conductors.

**ACCU-CHUCK™** technology provides outstanding axis stability, eliminating noise and vibration.

**ACCU-SPRAY™** system ensures better irrigation of the treated area, and safer treatment for your patients.

HARD**

## POWER IS CONTROL.

The Tornado are now the most powerful turbines of the brand thanks to its **Steady Torque technology**, which combines optimal air pressure distribution and exhaust flow.

## EXTENDED SERVICE LIFE.

The wear-resistant ceramic ball bearings guarantee an extended service life. Every Bien-Air turbine is individually, laser-balanced to perform at very high speeds with virtually zero vibration.

## INCREASED RELIABILITY AND PRECISION.

The **Accu-Chuck PreciPlus** chuck design ensures the most secure clamping of the bur. Noises are significantly reduced, thereby lending the Tornado unequalled practitioner and patient comfort.

# SEE BEYOND

*BETTER VISIBILITY, IMPROVED ACCESSIBILITY*

From the moment we started designing the NOVA handpiece, we had one ambition – not to compromise... thanks to the small head, the slim handle, its lightness, its low noise level and its extreme durability, it is quite simply the most advanced handpiece on the market.

# iCHIROPRO

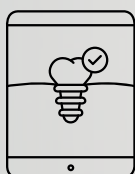

## YOUR ULTIMATE IMPLANTOLOGY SYSTEM

The iCHIROPRO is quite simply the most advanced implantology system on the market. Designed to assist you through its wide range of smart and digital features, it will lead you to unrivalled performance.

So, whether you're keen on immediate loading, you're a guided surgery user or want extensive paperless traceability of your operations, unlock your full power with the iCHIROPRO.

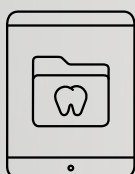

### End-to-end digital experience

Benefit from a full digital experience in patient management; from meticulous 3D planning and implant barcode scanning to accurate deployment on the day of the operation.

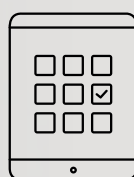

### Paperless traceability

Consult all your operation and patient data, as it's automatically and digitally documented and exported directly into the patient's electronic file with a single click.

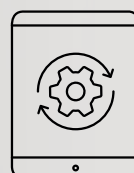

### Extensive implant library

You have access to a library of pre-programmed implant systems that you can follow step by step or choose to customise to suit your needs.

### Automatic updates

Get free and regular updates of your extensive implant database library and iOS versions to ensure you're always up to date.

## IMMEDIATE LOADING PROBABILITY

POWERED BY AI

MORE INFORMATION  
ON [BIENAIR.COM](http://BIENAIR.COM)

<sup>1</sup> M. Degidi et al., 2011 "Development of a New Implant Primary Stability Parameter: Insertion Torque Revisited", Wiley Periodicals, Inc. DOI 10.1111/j.1708-8208.2011.00392.

# UNLOCKING THE POWER OF IMMEDIACY

**Directly integrated into the iCHIROPRO, let us introduce you to ILP.**

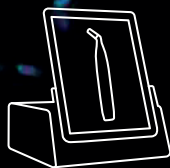

**ILP**, a new AI-driven tool, assists the surgeon in intraoperative decision-making by providing a real-time assessment of primary implant stability to support the decision on whether to proceed with immediate implant loading.

This machine-learning algorithm was developed in collaboration with Dr Degidi and is based on the clinically established concept of Insertion Torque Revisited (ITR) published in 2011<sup>1</sup>.

## Making a real difference to your work

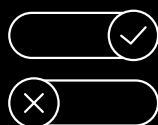

### All-in-one device

You already have it all: no additional equipment is needed to measure primary implant stability; everything is included in the new iChiropro App.

### Simplified decision-making

Interpret the generated results easily, thanks to an intuitive visualisation system.

### Time-saving process

Benefit from a straightforward process integrated directly into the surgical workflow, with no additional steps needed.

### Cost-effective solution

Take advantage of an attractive solution where no additional devices are required to get the immediate loading functionality.
