ONE-COMPONENT LIGHT-CURED
UNIVERSAL ADHESIVE

ONE COAT 7 UNIVERSAL

The bond for all situations

LEARN MORE

Only one universal bond for all
indications and etching techniques

Extremely economical:
up to 300 applications per bottle

Exceptional bonding values
and excellent marginal seal

ONE COAT 7 UNIVERSAL Refill Bottle - REF 60019539

1 x Bottle 5 ml

ONE COAT 7 UNIVERSAL ACTIVATOR 3ml - REF 7054
for self and dual cure materials

1 x 3 ml Activator
1 x Microbrush, black

*Methacryloyloxydecyl dihydrogen phosphate

SELF-ADHESIVE DUAL-CURING
RESIN CEMENT

SoloCem

One step reliable
cementation

Your partner for virtually all indirect bonding indications. Depending on the situation, you can cement self-adhesively or adhesively. For universal use – that's where SoloCem comes in.

Universal submicron hybrid composite

BRILLIANT EverGlow

Enduring gloss – made brilliant

96%
global mark
obtained
by publishers
Dental

With the universal composite BRILLIANT EverGlow highly aesthetic and long-lasting restorations can be achieved effortlessly.

- Exceptional polishability and long-lasting brilliance
- Aesthetic single-shade restorations
- Versatile shade system with three translucency levels
- Good wettability with minimal stickiness to the instrument
- Excellent sculptability and smooth consistency

BRILLIANT EverGlow Flow

The ideal complement

- Duo Shade system
- Ideal for cavity linings and small fillings
- Enduring gloss
- Good adaptation properties due to its low viscosity
- High stability and perfect thixotropic
- Absolute level of precision

HIGHLY AESTHETIC RESULTS

ParaCore

3 indications – 1 material

ParaCore simplifies the post & core restorative technique with its ability to be used as a 3 in-1 material for post cementation, core build-ups and crown & bridge cementation.

- One Material for 3 Key Indications (post cementation, core-build ups, crown & bridge cementation)
- Optimal monoblock bond interface between the dentin-post-crown
- Superior bond strength and durability

DuoTEMP

Double security keeps you smiling!

LEARN MORE

- Dual-cure
- High marginal integrity
- Easy removal
- One material with multiple indications

DuoTEMP Eco Kit - REF 7090

5 × Syringe of 5g

DuoTEMP Single Pack - REF 5831

1 × Syringe of 5 g

Marginal Seal Comparison

Cross-sectioned extracted human molars were filled with cured DuoTEMP and then immersed in methylene blue dye to determine the marginal sealing properties. DuoTEMP demonstrated excellent sealing properties.

Source: internal data. *Not a trademark of Coltene

Easy, time saving application

One component without mixing. Good retention in the cavity. Easy removal.

BRILLIANT Crios

Naturally brilliant permanent restorations

Close to nature due to biomimetics

- Tooth-like flexural strength for resistant restorations
- Tooth-like modulus of elasticity for a shock-absorbing effect and pleasant bite experience
- Abrasion-resistant composite, at the same time gentle on the antagonist
- Blends in extremely well to provide natural aesthetics

Efficient & economical

- Effortless polishing for fast gloss
- No firing process required
- Impressive grinding precision & speed
- Can be repaired intraorally

EDM NITI FILE SYSTEM

HyFlex EDM - OGSF Sequence

Would you like fast, safe and predictable?

Discover the new sequence solution!

The new HyFlex EDM OGSF sequence includes a new Orifice Opener and Glidepath file for opening the glide path, as well as a Shaping file for shaping the root canal over the full length. The defined treatment procedure makes the preparation easy and keeps the learning curve short. Due to the optimized match of tip sizes and tapers, designed in cooperation with Prof. Pedullà, the files provide a smooth feeling when shifting from one file to another and help you to keep control over the treatment.

Features and Benefits

- Efficient treatment with high cutting performance
- High fracture resistance and flexibility
- Centered preparation of the canal
- Only one shaping file
- Sterile blister
- 2 lengths: 21 and 25 mm

Testimonials & Studies

**Dr. Tomaž
Hitij**

In the past years the heat-treated Ni-Ti rotary files have become a gold standard in endodontics. However, heat-treated nickel-titanium endodontic instruments produced with the electro discharged machining are on a completely another level offering some unparalleled properties. Scientific studies show surprisingly high values of cyclic fatigue resistance, increased cutting efficiency and increased wear resistance with low degradation. The HyFlex EDM files systems offer the user a simple, predictable, safe, and cost-effective instrumentation in all clinical types of root canals, form straight to severely curved. The new OGSF sequence makes it possible to enlarge the root canal in a minimally invasive way to 30/0.04, making the EDM system even more versatile. If needed the root canals can be enlarged with EDM Hyflex 40/0.04, and further with the reducing taper from 50/0.03 to the file size up to 60/0.02 without losing on the flexibility of the files to best preserve the original shape of the root canal all the way to the apex. Pre-bending the controlled memory EDM files also offers a simple management for by-passing ledges previously formed in the root canal. The HyFlex EDM system is the system of choice for beginners and advanced users.

LEARN MORE

Dr Antonis Chaniotis

A versatile file system can adapt to many clinical scenarios and increase instrumentation predictability. The new HyFlex EDM OGSF sequence has just arrived to make everyday endodontic challenges delightful to treat. Lovely conservative OGSF shapes and ease of use.

Dr Andreea O. C. Roşu

With COLTENE's new HyFlex EDM OGSF sequence endodontic procedures becomes easier. Owing to the defined, easy-to-remember sequence, learning to use these files is relatively quick, and being intuitive, the sequence is easily recalled and repeated.

- 1 × Battery

Digital assistance system for canal preparation

CanalPro Jeni

Autonomous "navigation" in the endo canal owing to revolutionary software

The new CanalPro Jeni endomotor has a patent-pending digital assistance system for canal preparation, which uses complex algorithms to control the file movement at millisecond intervals. The rotary motion and speed are continuously controlled based on current intensity and torque.

Different routes, obstacles and situations

CanalPro Jeni is named after its developer Prof. Dr. Eugenio Pedullà and guides you safely through the traffic like a navigation system. As such, the Jeni system automatically adapts to the individual root canal anatomy, working in unison with the mechanical and chemical preparation every step of the way.

CanalPro Jeni, complete set

A-SILICONE BITE REGISTRATION MATERIAL

Jet Blue Bite

Bite registration with the highest precision

Accurate bite registration is essential to ensure a true-to-life representation of the occlusion between the upper and lower teeth in the articulator. Correspondingly, the requirements placed on the material are varied. COLTENE's decades of expertise in high-quality silicone materials are reflected in Jet Blue Bite, a bite registration material that delivers fast and precise results.

Bite register	Silicone	Shade	Shore hardness*	Dimensional stability	Working time	Setting time	Taste
Jet Blue Bite fast	A		88 A	0.08 %	30 sec.	40 sec.	Neutral
Jet Blue Bite superfast	A		88 A	0.12 %	20 sec.	30 sec.	Neutral

HySolate Dental Dam Non-Latex

Size	Colour	Thickness medium	Quantity
152 x 152 mm	Green	H09105	x15
		H09106	x75

HySolate Clamps

Dental dam fit partly depends on how it is secured to the teeth. COLTENE makes fixation simple with both Wingless and Winged clamps. Winged clamps have projections at the jaws while wingless do not. Our aim is to accommodate application techniques with any dentist's style. Our dental dam clamps are manufactured from high quality stainless steel for greater durability.

Gloss Finish Winged Clamps

- #00 For upper and lower premolar and anterior teeth
- #1 General purpose, upper premolar clamp
- #2 Premolars and upper incisors
- #2A Premolars and upper incisors
- #3 Flat jawed, small molar clamp
- #4 Small upper molars, deciduous teeth
- #7 Flat jawed, general purpose, lower molar clamp

- #8 General purpose, upper molar clamp
- #8A Downward sloped jaws for small, partially erupted molars
- #9 Anterior teeth
- #14 For partially erupted or irregularly shaped molars
- #14A Downward sloped jaws for large, partially erupted molars
- #13A Serrated Jawed, Upper Right Molars
- #12A Serrated Jawed, Upper Left Molars

Application steps can be combined by placing the dam, clamps and frame simultaneously. Once applied, the dam is stretched under the wings of the clamp.

Brinker Clamps (Tissue Retractors)

Brinker Clamps have extra inclined beaks to provide maximum retraction of the gingiva. They provide maximum retraction without laceration of gingival tissues.

→ Available as a set or sold individually (not incl. in offer)

Gloss Finish Wingless Clamps

#212

#W00

#W2

#W2A

#W3

#W7

#W8

#W8A

#W9

#W14

#W14A

#W56

#212 Anterior teeth

#W00 For upper and lower premolar and anterior teeth

#W2 Premolars and upper incisors

#W2A Premolars and upper incisors

#W3 Flat jawed, small molar clamp

#W7 Flat jawed, general purpose, lower molar clamp

#W8 General purpose, upper molar clamp

#W8A Downward sloped jaws for small, partially erupted molars

#W9 Anterior teeth

#W14 For partially erupted or irregularly shaped molars

#W14A Downward sloped jaws for large, partially erupted molars

#W56 Universal molar clamp

To apply, first position the clamp intraorally then stretch the dental dam over the clamp and tooth. Wingless clamps are designated with a "W" (wingless) for easy identification.

roeko Surgitip

Surgitip aspirator tips are proven aids in drying the oral field of treatment in surgery and endodontics. They are intended for low volume aspiration of liquid and solid substances and enable aspiration in restricted dental operating environment. Their specific design make them suitable for working under microscope and loupe. Hygienic handling properties and ease of use make them an enjoyable device in the dental office.

- Green tip provides excellent contrast to the treatment site
- Open field of view due to the narrow shape and conical tip
- Hygienic and time-saving, being sterile, individually packaged and ready for immediate use
- Various tip geometries and diameters for a wide range of treatments

Surgitip 2.5 mm
20 pcs.

DIATECH ShapeGuard

Strong in polishing. Gentle on surfaces.

Ideal for polishing BRILLIANT Crios or any other indirect restorations. A perfect compliment to existing DIATECH diamond polishing systems

- Adapts to any surface
- Uniform pressure distribution due to flexible lamellas
- Morphology of tooth is preserved
- Fast, easy and intuitive finishing & polishing
- Optimised polishing systems for composite and ceramics

ShapeGuard Composite Polishers refill (pack of 5)

- REF 60019878 Purple
- REF 60019880 Light Blue

ShapeGuard Ceramic Polishers refill (pack of 5)

- REF 60019881 Blue
- REF 60019882 Red
- REF 60019883 Grey

ShapeGuard Zirconia Polishers refill (pack of 5)

- REF 60022004 Green
- REF 60022005 Orange

ShapeGuard Zirconia Polishing Plus Kit

REF 60022020

This kit offers a comprehensive selection of silicone polishers for prepolishing (green polishers) and high luster polishing (orange polishers) of zirconia restorations.

ShapeGuard Ceramic Polishing Kit

REF 60019917

This kit offers a comprehensive selection of silicone polishers for finishing (blue polishers), prepolishing (red polishers) and high luster polishing (grey polishers) of ceramic restorations.

ShapeGuard Composite Polishing Kit

REF 60019916

This kit offers a comprehensive selection of silicone polishers for prepolishing (purple polishers) and high luster polishing (blue polishers) of composite restorations. While minipoints are used to smoothen and polish interproximal and hard to reach occlusal areas, the cups are especially indicated for cusp polishing, but also occlusal polishing in general.
