Osstell Beacon

Measurement of implant stability

Osstell Classic

Osstell Classic helps you to objectively determine implant stability and measure the degree of osseointegration.

£ **1,350**

RRP £2,800

Osstell SmartPegs

The SmartPeg measures the resonance frequency when it is attached to an implant.

£ **85**

RRP £117

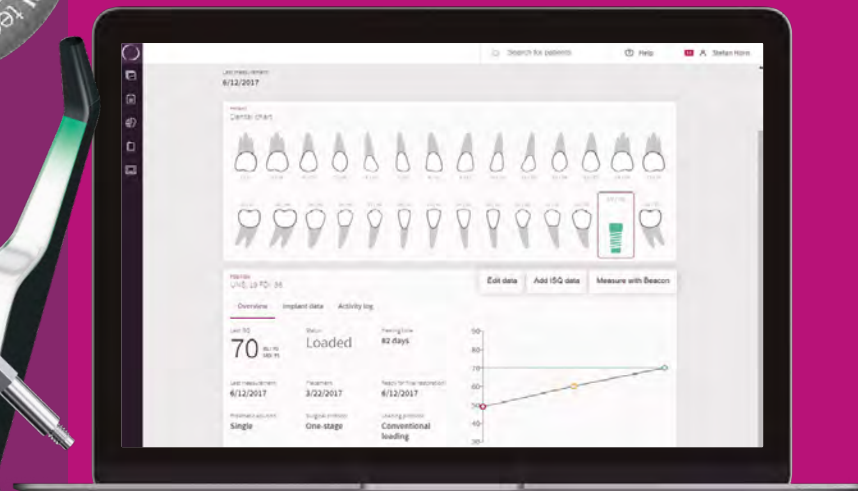

Osstell Beacon

Measure and evaluate the stability of the implant and control its osseointegration quickly and easily thanks to the easy to read colour light indicator and ISQ reading. Reduce treatment times and avoid rejection in high-risk patients.

£ **1,650**

RRP £5,277

OSSTELL
A W&H COMPANY

What are the positive outcomes when using the Osstell Implant stability solutions?

- › A positive experience for patients, encouraging trust through understanding
- › Enhanced patient education builds confidence, resulting in increased treatment acceptance
- › Reduction in treatment visits and failures with improved average healing times
- › Improved outcomes for patients with risk factors
- › Enhanced communication between specialists ensuring a more synergistic approach to treatment
- › Improved treatment documenting

Osstell ISQ devices with the Osstell ISQ Scale help implantologists to make informed implant treatment decisions.

Osstell Connect
FREE App for
Osstell Beacon

Osstell Connect is designed to document quantified data which ensures traceability, whilst complimenting data in your Patient Management System.

Systems with graphical presentation of data and statistics which is great for patient communication. You can easily present treatments in a graphic and totally personalized way, even generating pdf reports, while having access to the world's largest online surgical portal for peace of mind. The patient consultation tool allows you to easily communicate your proposed implant.
