

# Minimal abrasion. More comfort.

## VivaDent® Fluoridation Gel

Mineral boost: to gently protect  
against caries, every day

# Minimal abrasion. High protection.

Powerful protection and gentle care with essential minerals.

VivaDent Fluoridation Gel offers the perfect balance of gentle care and advanced protection. Its non-abrasive formula, with fluoride, strengthens enamel, reduces cavity risk, and provides a pleasant mouthfeel. Ideal for daily use, it ensures long-lasting dental care with a focus on comfort and safety. The gel actively protects teeth, reduces sensitivity in tooth necks, fortifies enamel, and promotes overall dental health.

- High protection.
- More comfort.
- Stronger teeth.
- Mild taste.

---

## Less abrasion. High protection.

VivaDent Fluoridation Gel provides comprehensive protection with its advanced formula. The combination of calcium, fluoride, and phosphate remineralizes weakened enamel, improving its hardness and resilience. Soothing ingredients help maintain a healthy oral environment for complete oral health protection.

---

## Less abrasion. More comfort.

VivaDent Fluoridation Gel's low-abrasion formula protects enamel and ensures a pleasant, gentle brushing experience with minimal foaming. Its neutral pH value prevents unnecessary wear while offering effective, long-lasting protection for enhanced well-being when used daily.

# Minimal abrasion. Stronger teeth.

VivaDent Fluoridation Gel is suitable for cleaning teeth and actively supports good oral health.

Whether for daily use or targeted application, VivaDent Fluoridation Gel is the perfect addition to boost everyday oral care. The gel addresses multiple aspects of dental care, aligning with professional recommendations for optimal results.

---

## Less abrasion. More strength.

VivaDent Fluoridation Gel offers effective protection with minimal abrasion, ideal for long-term dental care. Containing fluoride, calcium, and phosphate, it protects teeth, supports remineralization, and strengthens weakened tooth structure. Especially beneficial for patients with worn enamel, it helps prevent acid erosion while promoting tooth repair and fortification. A safe and gentle choice for maintaining dental health and resilience.

---

## Less abrasion. Mild taste.

VivaDent Fluoridation Gel offers a mild taste for optimal user comfort. Together with its gentle properties, such as a neutral pH value and low foaming, the gel makes tooth brushing a pleasant experience.

# Recommended by dentists

Dentists recommend VivaDent Fluoridation Gel for the following reasons:

**Potassium fluoride:**

The potassium fluoride (1450 ppm) contained in VivaDent Fluoridation Gel remineralizes and strengthens tooth enamel. It protects the teeth against tooth decay by increasing its resistance to acids and abrasion

**Essential minerals:**

Calcium and phosphate in VivaDent Fluoridation Gel promote remineralization and strengthen enamel by restoring minerals lost from acid exposure, helping prevent tooth decay and supporting overall dental health.

**Soothing ingredients:**

VivaDent Fluoridation Gel contains soothing ingredients D-panthenol and xylitol, providing nourishment and care for irritated oral tissues while supporting gum and mucous membrane health.

**Pleasant taste:**

A fresh mint flavour gives a refreshing feeling in the mouth and leaves the breath fresh and clean throughout the day.
