

# Trusted protection. Soothing relief.

## VivaDent® Protecting Gel

Soothing gel: to care for oral  
wounds and support dental  
health

## Comprehensive protection and intense care for oral health.

VivaDent Protecting Gel offers soothing care for irritated gums and oral wounds. The gel protects against caries and supports the longevity of restorations and prosthetics. Its antimicrobial properties promote overall oral and dental health and its unique formula provides moisture for gentle care. VivaDent Protecting Gel can be used over extended periods without altering the sense of taste. Its smooth consistency makes it easy to apply precisely where needed and in the appropriate amount. Suitable for all ages, it ensures optimum oral care and is the ideal choice for regular daily prophylaxis or therapeutic aftercare at home.

### **For daily oral care and aftercare:**

The gel protects the tight spaces between teeth, where plaque and bacteria often accumulate, when applied with an interdental brush.

### **Gentle and safe:**

The alcohol-free formula does not stain teeth and offers a pleasant taste and experience – even with regular use.

### **After dental procedures:**

Protects and soothes sensitive tissue and promotes speedy healing.

# Trusted protection. Long-lasting health.

Proper care is key to maintaining good oral health over time. VivaDent Protecting Gel helps achieve this. Its unique combination of ingredients protects the gums and healthy tooth structure while nourishing the mucous membranes. The pleasant taste encourages regular use.

**For cleaning, protecting, and maintaining the health of teeth, gums, peri-implant tissues, and mucous membranes**

VivaDent Protecting Gel cleans and protects teeth, gums, peri-implant tissues, and mucous membranes. It supports their health by inhibiting bacterial metabolism and soothing with its caring properties.

**For cleaning between teeth when there is an increased risk of caries and for preventing gingivitis and periodontitis**

Especially recommended for those with an increased risk of caries. The formulation aids in thoroughly cleaning the spaces between teeth, where plaque and bacteria can become particularly harmful. It also helps prevent gingivitis and periodontitis from developing, promoting long-term dental health.

**For oral care before and after the treatment of gingivitis, mucositis, denture stomatitis, periodontitis or peri-implantitis**

Ideal for pre- or post-dental care, VivaDent Protecting Gel aids in healing gingivitis, mucositis, denture stomatitis, periodontitis, and peri-implantitis by soothing, protecting, and reducing inflammation risk.

**For moisturizing gums and oral mucous membranes**

VivaDent Protecting Gel moisturizes dry gums and oral mucous membranes, providing comfort and relieving irritation caused by dryness.
