

SHADELESS omniCHROMA

Matches Every Tooth

16 limiting shades of conventional composites

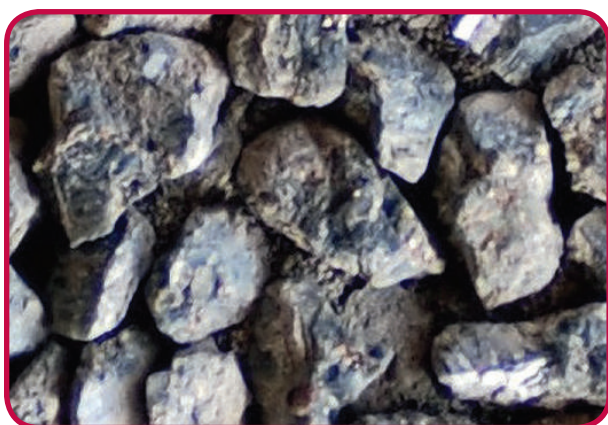

Infinite shades of Omnicroma: The entire tooth spectrum

Infinite shades - all in one syringe!

Tokuyama's Spherical Revolution! The surface is decisive

Which is easier to polish?
Which reflects light more uniformly?
Which shines more beautifully?

Tokuyama's Spherical Technology

OMNICHROMA: colour through light

When Tokuyama developed the optical spherical filler it was inevitable that one day they would formulate a shadeless composite. Optical Omnichroma, conducts shading and intensity of surrounding tooth structure and blends with it seamlessly! Tokuyama's patented spherical fillers have won numerous awards for superiority and benefits for dentists and patients alike.

Other composites contain irregular shaped sized fillers, which interfere with polishability, shade blending, staining and longevity. Tokuyama's filler exhibit exceptional properties. They deliver pleasant handling and workability, perfect colour matching and easy, effective polishing. The gloss and polish are long lasting, guaranteeing good looking restorations and consequently, satisfied patients. The spherical fillers are synthesised at molecular level producing uniform spherical particles of ideal size.

OMNICHROMA: mirror-smooth surface

CONVENTIONAL
Nano-Hybrid Fillers

Rough, irregular surfaces reflect light more diffusely: Less gloss

OMNICHROMA
Spherical Pearls

Uniform reflection of light as with a mirror: Natural high gloss

OMNICHROMA: in common with all Tokuyama composites

Uniquely
Time-Saving

Shade taking and matching is a thing of the past. Polishes in a flash!

Uniquely
User-Friendly

The perfectly, round, smooth fillers provide excellent cavity adaption and no sticking to instruments!

Uniquely
Aesthetic

Instant matching from light reflection and refraction.

Uniquely
Patient-Friendly

Bis-GMA free. Unique shading from light with perfect gloss: colour change if the tooth colour changes. Perfect, long-lasting polish that is resistant to staining.
